Language, Emotions, and Development

A U.C. Berkeley Research Project for Preschoolers from Mexican American and Chinese American Families

Who can participate?
Mexican American or Chinese American children (3 to 5 years old) who are currently enrolled in a Head Start Program

Participating families receive:
- A check for $70.00 (if you complete the interview at U.C. Berkeley, you will receive an additional $30.00)
- A small prize for your child

What are the procedures?
You and your child will attend a 2.5-hour interview session conducted by our team at either U.C. Berkeley or at your home, which includes:
- Parent interview & survey
- Child language and emotion assessments
- Parent-child joint activities

What is the study trying to do?
- Learn how language and bilingual development influence children’s emotional competence
- Identify things in children’s environment that can promote language and emotional development

How do I learn more?
