

Language, Emotions, and Development

A U.C. Berkeley Research Project for Preschoolers from Mexican American and Chinese American Families

Who can participate?

Mexican American or Chinese American children (3 to 5 years old) who are currently enrolled in a Head Start Program

Participating families receive:

- A check for **\$70.00** (if you complete the interview at U.C. Berkeley, you will receive an additional **\$30.00**)
- A **small prize** for your child

What are the procedures?

You and your child will attend a 2.5-hour interview session conducted by our team at **either** U.C. Berkeley **or** at your home, which includes:

- Parent interview & survey
- Child language and emotion assessments
- Parent-child joint activities

What is the study trying to do?

- *Learn* how language and bilingual development influence children's emotional competence
- *Identify* things in children's environment that can promote language and emotional development

How do I learn more?
